トミカわくわくドライブ TOMICA Exciting Drive

⚠ WARNING

To parents, please be sure to read the following.

- There are small parts with this toy. Do not give them to children under age 3 to avoid accidental swallowing/suffocation.
- Do not play with anything other than Tomica (mini car).

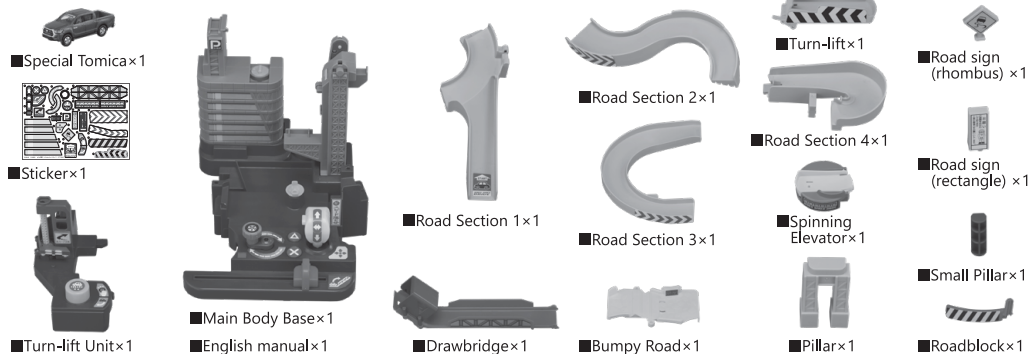

⚠ CAUTION

- Do not face closely towards the Drawbridge and Turn-lift as there is a risk that Tomica may jump out of them
 - Be careful not trap your fingers, hair, clothes, etc. in moving parts.
 - Do not cover the head or face with plastic bag.
- There is a risk of suffocation. ● There is a risk of unexpected accident. After using it, please keep it out of reach of children under age 3.

<IMPORTANT NOTES>

- Thoroughly read the information on all sides of the package and manual.
- Do not pull or bend movable parts or mounting sections in inappropriate directions.
- Play on a flat surface.
- Do not carry the product after assembled or with Tomica cars loaded.
- Do not use minicars other than Tomica.
- Please note that this product is not compatible with some types of Tomica (tall cars, heavy or light cars, narrow cars, special cars, etc.).
- Tomica 4D, Long Tomica, Tomica Hyper Series, Dream Tomica, Thomas Tomica, Tomica Premium, CARS Tomica, Disney Motors, Tomica Star Wars, and Toy Story Tomica cannot be used.
- Depending on the situation in which the product is used, the floor could be damaged, or the coating of the Tomica could be peeled off.
- Please dispose of packing material after opening it.

How to play TOMICA Exciting Drive

4 Raise the Drawbridge up!

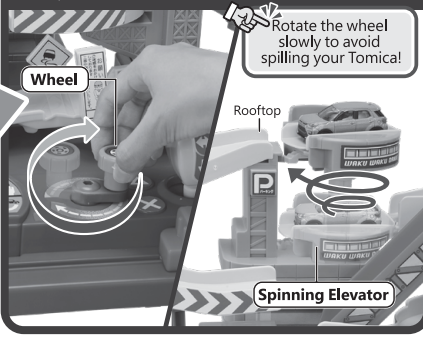

Slowly pull the slide lever to the left. The Drawbridge will lift up, and carry your Tomica to the next course.

Be careful not to move too fast when pulling the lever

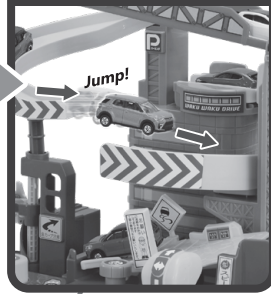

5 Take your Tomica to the top by Spinning Elevator!

When your Tomica arrives the Spinning Elevator, rotate the wheel to spin the elevator, it will carry your Tomica to the rooftop.

6 Tomica jumps!

Your Tomica speeds along the rooftop area, and jumps toward the road ahead.

7 Launch your Tomica!

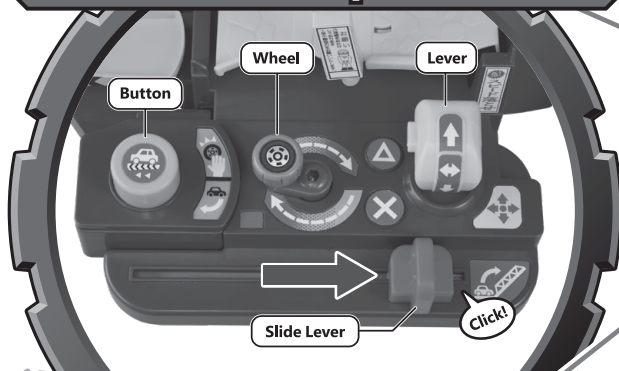

When the Roadblock is raised, your Tomica will exit the track.

When the Roadblock is lowered, your Tomica will return to the beginning of the track.

Interact with the buttons and levers on control panel!

CAUTION

For safety reasons, the slide lever is designed to disengage internally when pulled hard. If it comes off, push the lever to the right until hear a "click" sound and it will snap back into place.

3 Let's use the Turn-lift to carry your Tomica upwards!

Press the button continuously to raise the Turn-lift.

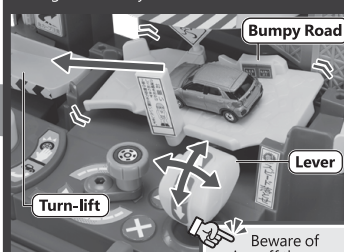

If the Turn-lift stops at descending midway, please press the button several times.

Keep pressing the button to prevent your Tomica from spilling!

2 Wobble across the bumpy road!

Operate the lever backwards and forwards, left and right to move your Tomica!

Level your skills up!

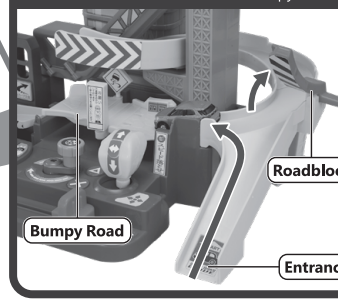

Increase difficulty by removing the Road Signs.
※Please put the removed Road Signs at the position shown in below picture.

Beware of going off the course!

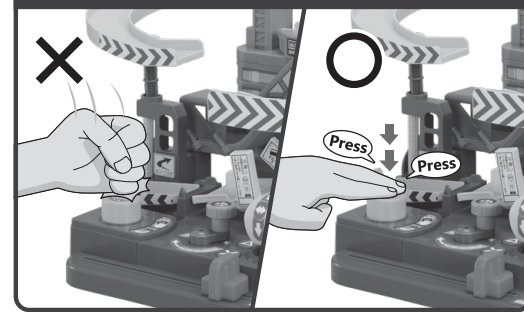

1 Let's get your Tomica on the track!

Raise the Roadblock to enter the Bumpy Road.

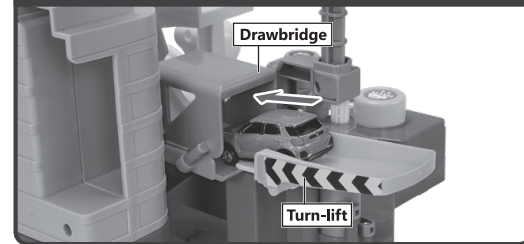

Some tricks for skillful Tomica operation!

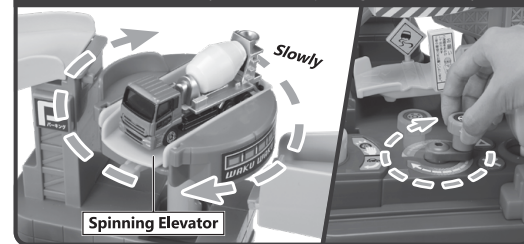

Don't slam the button, but keep pressing it!

When your Tomica leaves the Turn-lift and arrives Drawbridge, make sure it is properly on board before pulling the slide lever!

When playing with trucks or lighter Tomica, turn the wheel slowly to raise the Spinning Elevator slowly.

Tomica info

Tomica that can not be played together

Specific shape of Tomica and those other than four wheelers, such as bulldozers and motorbikes.

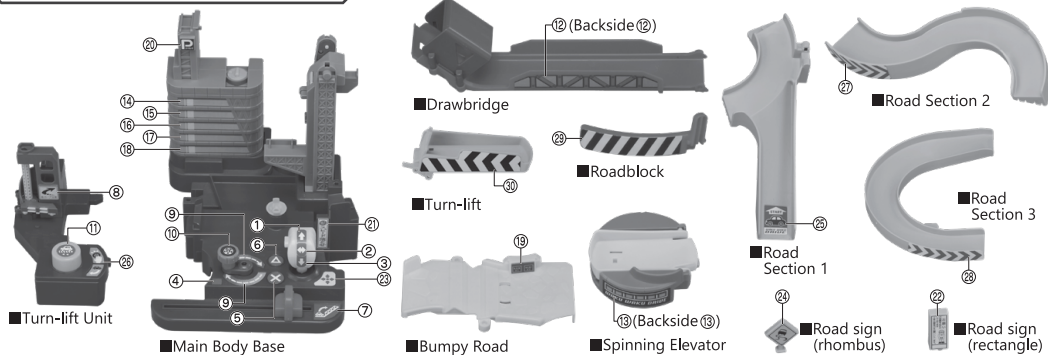

Tomica that you may feel difficult to play with

Light vehicles such as buses and trucks, vehicles with unbalanced center of gravity in the front and rear, small, wide or heavy vehicles.

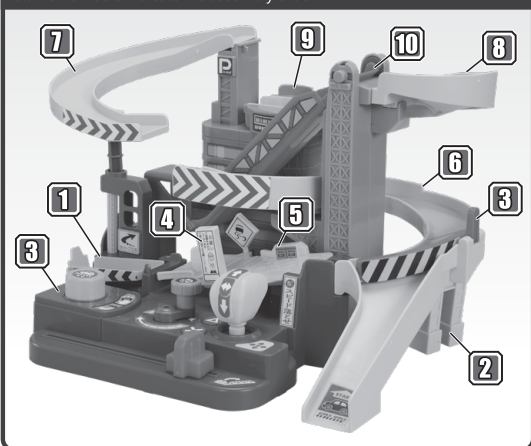

How to affix stickers

※Affix stickers by referencing below product images and sticker numbers.

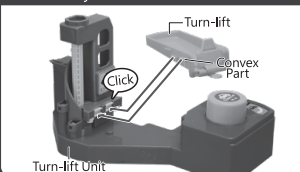

How to assemble

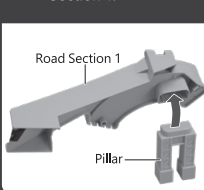

Assemble the parts according to the reference images below.
※The numbers indicate the assembly order.

1 Follow the direction shown in below image to insert the convex parts of the Turn-lift into the Turn-lift Unit, until you hear a "click".

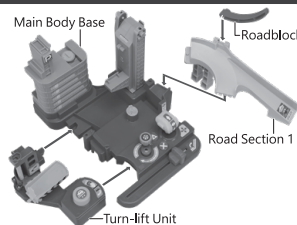

2 Insert the Pillar into the underside of Road Section 1.

3 Insert the Turn-lift Unit into the Main Body Base from the side. Attach the Roadblock to Road Section 1, and insert it into the Main Body Base from above.

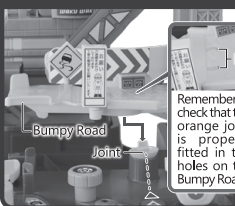

Number 1 to 4 are marked at the backside of each Road Section. Please use them as a reference for assembly.

4 Insert the Road signs on the Bumpy Road.

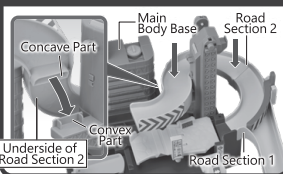

5 Insert the convex part of the orange joint to the holes on the Bumpy Road from bottom.

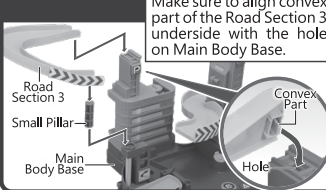

Remember to check that the orange joint is properly fitted in the holes on the Bumpy Road.

6 Insert Road Section 2 into Road Section 1 and the main body base from above. Make sure to align convex part of main body base with the concave part on the underside of Road Section 2.

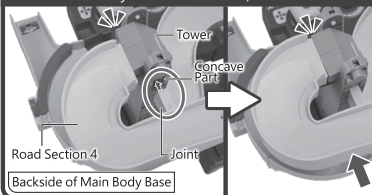

7 Insert the Small Pillar in the position of Main Body Base shown in the picture first, then insert Road Section 3 into the Small Pillar and Main Body Base from above.

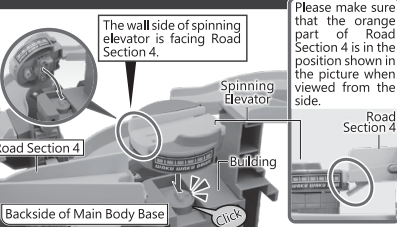

Make sure to align convex part of the Road Section 3 underside with the hole on Main Body Base.

8 From the backside of the Main Body Base, align Road Section 4 with the top of the Tower, and insert the joint into the concave part of the Tower (the photo shows the backside of the main body base from above).

9 Follow the Spinning Elevator direction shown in picture, insert it into the joint of Building until you hear a "click" sound.

Please make sure that the orange part of Road Section 4 is in the position shown in the picture when viewed from the side.

10 Align the concave part of Drawbridge with the convex part of Tower, then insert the Drawbridge from above.
